

## Anders Apple

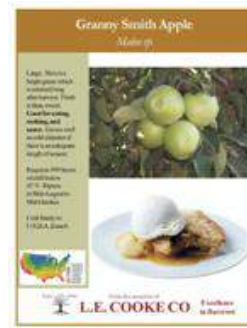

Medium to large. Greenish-yellow base with red striping. Crisp, white flesh is sweet, tangy, flavorful. Excellent all-purpose apple. Green, reminds you of Granny Smith. Ripe, reminds you of Fuji. Said to be codling moth resistant (?). Holds 3+ months!

## Fuji Apple

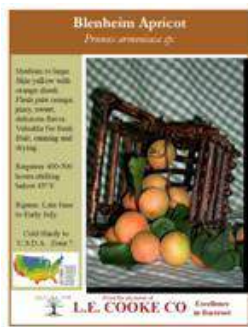

Sweet, crisp and flavorful, excellent keeper. Late September. Excellent pollinizer for other apple varieties. Self-fruitful.

## Granny Smith Apple

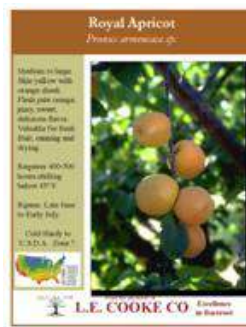

Bright green skin, tart/sweet flavor, great texture. For eating, cooking, sauce. October - November harvest.

## Blenheim (Royal) Apricot

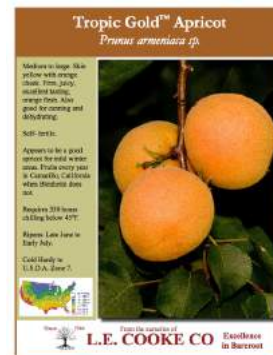

The standard, with delicious juicy fruit. Very early in this area-- late May - June.

## Royal Apricot

The standard, with delicious juicy fruit. Very early in this area-- late May - June.

## Tropic Gold Apricot

Yellow-orange fruit, firm; excellent flavor. Heavy yields. Late June - early July.

## Boysenberry, thornless

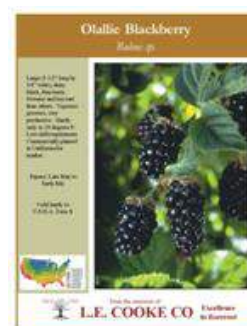

Very large fruit, very productive. Reddish-black fruit. Sweet and tart all-purpose berries. The berry of Knott's Berry Farm! June.

## Loganberry, thornless

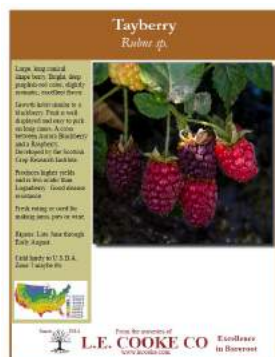

Dark red fruit. Technically a blackberry/raspberry hybrid, but more like a blackberry in flavor and fruit size. Starts ripening early. Excellent variety. May - June.

## Olallie Berry

Black, shiny berries with 'wild blackberry' flavor. Very productive. Blackberry class. Late May.

## Tayberry

Blackberry/raspberry hybrid, with flavors of both parents. Dark red/purple fruit. June.

## Triple Crown berry

Large fruit, excellent flavor. Blackberry class. Late producer extends season into July.

## Youngberry, thornless

Similar to Boysenberries but somewhat sweeter, with less vigorous vines. June.

## Heritage Raspberry

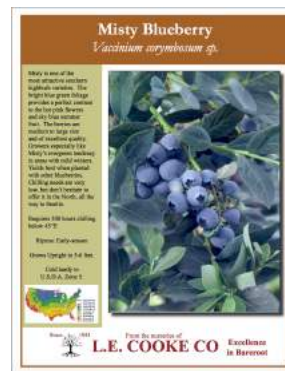

A moderately heat-tolerant variety of red raspberry. Everbearing (each cane produces a fall crop in first year, early summer crop in second year).

## Jewel blueberry

Southern Highbush. 5 to 6 feet tall with 4 to 5 foot spread. Vigorous plant, very productive, large high-quality fruit. Early to mid season.

## Misty blueberry

Southern Highbush. Upright, vigorous bush with clean attractive foliage; may be evergreen. Fruit ripens very early.

## O'Neal blueberry

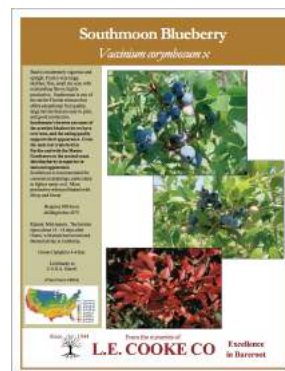

Southern Highbush. Four-foot-tall bush. Attractive flowers, nice fall color. Fruit ripens very early and over a long period. "Considered by some to have the best flavor of any of the Southern Highbush types..." [MBN]

## Sharpblue blueberry

Southern Highbush. Vigorous growth to 6 feet. Very adaptable, very low chilling requirement, tolerant of most soil types. Popular in SoCal. Very large fruit "must be picked frequently in hot weather or it will overripen." [MBN]

## Southmoon blueberry

Southern Highbush. Upright to 4 to 6 feet. Ripens at end of May. Very productive.

## Sunshine Blue blueberry

## Black Mission Fig

## Blackjack Fig

Southern Highbush. Very compact bush with showy pink flowers; evergreen. Tolerant of high pH soil; low chilling requirement.

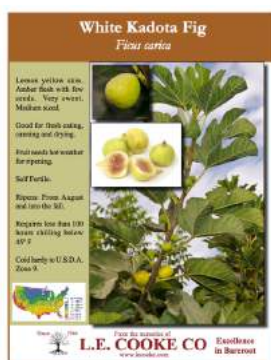

Purplish-black skin, pink flesh, rich flavor. Heavy bearing large tree with 2 crops per year. Fresh or dry. One of the classic California figs.

Natural dwarf tree, easily kept under 10'. Fruit like Black Mission. 2 crops per year.

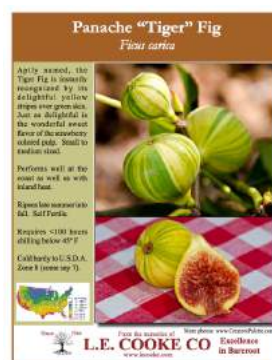

## Brown Turkey Fig

## Kadota Fig

## Panache (Tiger) Fig

Brown skin, pink flesh. Sweet, rich flavor, used fresh. 2 crops per year. Widely adapted. Small tree. One of the classic California figs.

"White" fruit (greenish-yellow) is firm-textured, good for processing, very sweet. 2 - 3 crops per year. Large, beautiful tree, can be kept smaller by pruning.

Striped fruit is very sweet. 2 crops per year.

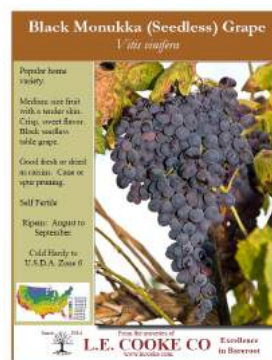

## White Genoa Fig

## Black Emerald Seedless

## Black Monukka Seedless

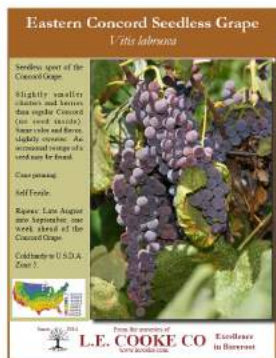

Greenish-white skin, pink flesh, very juicy and sweet. 2 crops per year.

Jet black when ripe. Firm flesh, early fruiting, very sweet. 1994 USDA introduction. July - August.

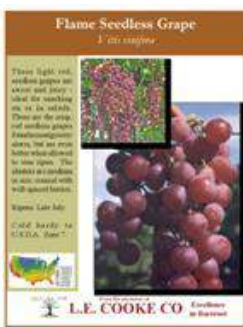

Seedless black table grape, very sweet with crisp texture. August - September.

## Flame Seedless Grape

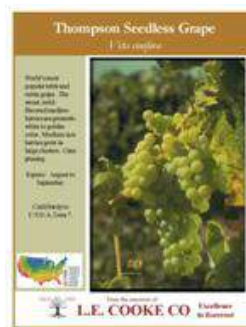

## Thompson Seedless Grape

Blue black seedless grapes with strong, rich flavor. Popular for juice, jelly. Attractive foliage; nice for arbors. August - September.

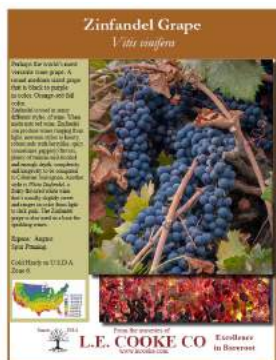

Very vigorous, productive red seedless grape with good flavor and texture.  
Ripens August - September

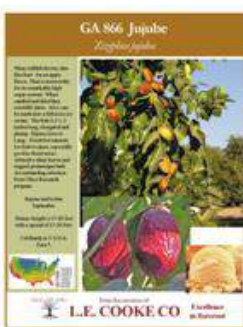

The seedless grape everyone knows. Easy to grow. Thin the clusters for larger fruit. Early August.

## Zinfandel Grape

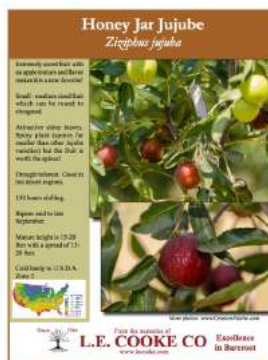

Planted in California since the 1850's. Very high sugar content, suitable for fresh eating or to dry as raisins.

## GA 866 Jujube (Chinese

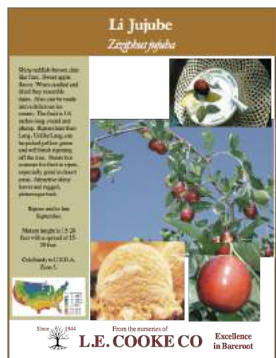

New selection from Chico breeding program. Large fruit. Very high sugar content, delicious fresh off the tree. Sweet as dates when dried. Fall ripening.

## Honey Jar Jujube (Chinese

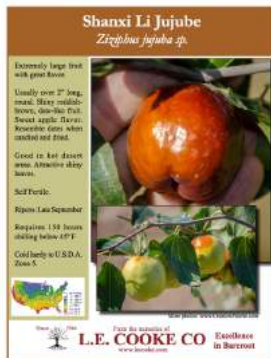

Fruit is small, crunchy, juicy, and very sweet! Eat them right off the tree, or dry them. Sweet as dates when dried. Late summer ripening.

### Li Jujube (Chinese Date)

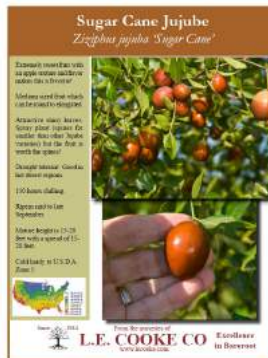

Pretty little tree with shiny foliage. Very tough, easy to grow. Produces loads of fruit that look like little elongated brown apples. Sweet as dates when dried. Fall ripening.

## Shanxi Li Jujube (Chinese

Very large fruit, usually 2 inches. Sweet apple flavor. Late summer ripening.

## Sugar Cane Jujube

"Small to medium fruit...extremely sweet....Sweet apple flavor."  
Late summer ripening.

## Black Beauty Russian

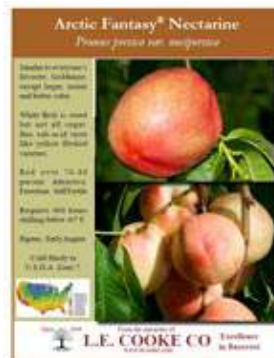

Fruit like juicy blackberries. Harvest in early summer for over a month. Birds love them. Naturally dwarf, slow-growing. Seeds are sterile.

## Teas Weeping Mulberry

Sweet, juicy fruit in early summer. Birds love them. Tree makes a striking accent, or playhouse for young kids.

## Arctic Fantasy Nectarine

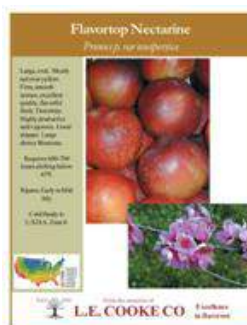

Great new white-flesh nectarine. Large rich-flavored red fruit. Early August.

## Fantasia Nectarine

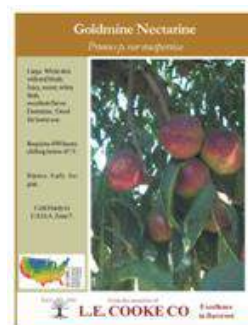

Bright red skin, firm fleshed fruit. One of the best. Mid - late July.

## Flavortop Nectarine

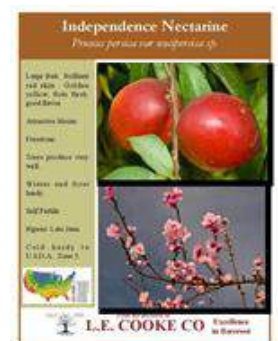

Excellent fruit, firm texture; showy flowers. Early to Mid-July.

## Goldmine Nectarine

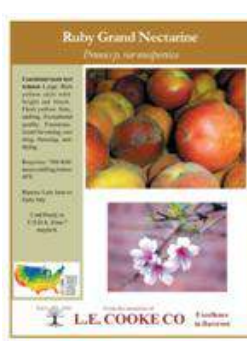

Large, attractive juicy fruit with white flesh and rich, sweet flavor. Early August.

## Independence Nectarine

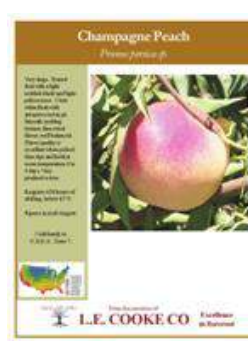

Bright red skin, firm flesh, excellent flavor. One of the best. Late June.

## Ruby Grand Nectarine

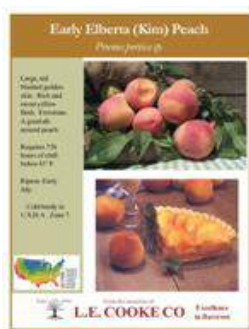

Large fruit, yellow skin with red blush. Firm, melting flesh. Excellent! Taste test winner. Late June to early July.

## Champagne Peach

Medium-large light red fruit with white flesh. Melting texture. Good balance of sweet and tangy flavor. A gourmet peach! Mid-August.

## Early Elberta Peach

## Fay (Late) Elberta Peach

## Gleason (Lemon) Elberta

(aka Kim and July Elberta). Elbertas have yellow skin tinged with red. Very rich, distinctive flavor. Good all-purpose peaches; the ones you grew up with. Early July.

(aka Late Elberta) Heavy production of outstanding Elberta peaches on this late variant. Very rich, distinctive flavor; good all-purpose peach. Early August.

(aka Improved Elberta and Lemon Elberta) Another excellent variant of Elberta, ripens in early July.

## Golden Glory Miniature

## June Gold Peach

## Lemon (Gleason) Elberta

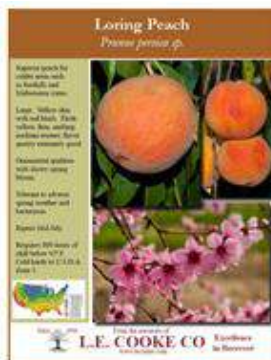

Miniature tree with beautiful pink flowers and juicy fruit with good flavor. Very large, yellow-fleshed fruit. Mid to late August. 700 hours.

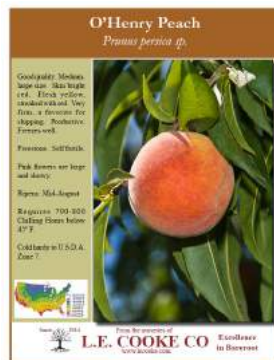

Large fruit with rich flavor, melting texture. Cling. Prolific. Late May to early June.

(aka Improved Elberta and Lemon Elberta) Another excellent variant of Elberta, ripens in early July.

## Loring Peach

## O'Henry Peach

## Red Baron Peach

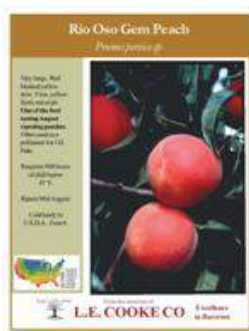

Showy flowers, large fruit, very productive, great texture, top-rated flavor! Highly recommended! Mid-July.

Large showy flowers. Very productive, firm texture, very good quality fruit with rich flavor. Excellent all-purpose peach. Late August.

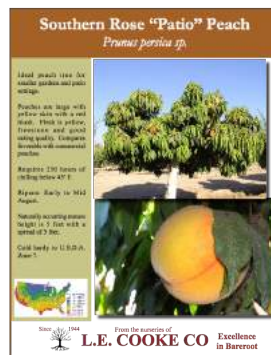

Stunning double red blooms--the showiest of all. Wonderful landscape tree. Very good sweet, juicy fruit over a long period. Mid-July to early August. Low chilling hours.

## Rio Oso Gem Peach

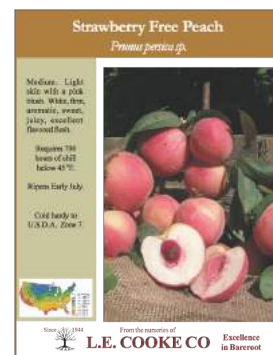

Very large fruit with firm texture and excellent flavor, on a naturally small tree. An outstanding very late variety. Mid-August.

## Southern Rose Miniature

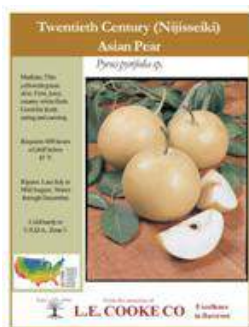

Miniature tree with juicy fruit with very good flavor. Very large, yellow fruit with a red blush. Early to mid August. 250 hours.

## Strawberry Free Peach

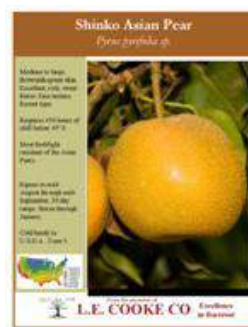

White peach with firm texture. Very sweet, aromatic, juicy. Excellent. Early July.

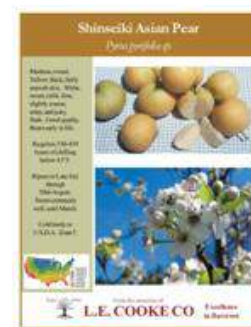

## 20th Century Pear (Asian) Shinko Pear (Asian)

(aka Nijisseiki, "Apple Pear") Earliest variety. Juicy fruit with pleasant flavor. Self-fruitful. Late July - mid-August.

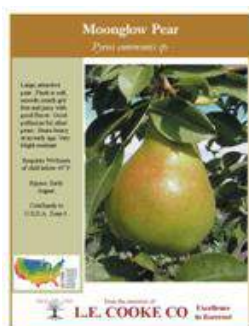

Medium - large brownish fruit. Very rich, sweet with good texture. One of the best. August - mid-September.

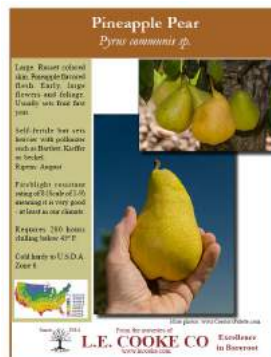

Medium size yellow, juicy fruit with mild flavor. Self-fruitful. Late July - mid-August.

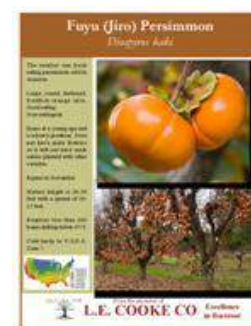

## Moonglow Pear (European) Pineapple Pear (European) Fuyu Persimmon

Large brownish fruit like Bartlett. Soft flesh, little grit. Very fireblight resistant. Early August.

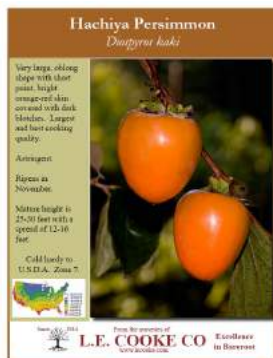

Large fruit with russeted skin. Sweet flesh tastes like pineapple. Fruits very young, often first year. Very fireblight resistant. August.

Medium size flattened red-orange fruit can be eaten while still firm. Non-astringent. November. A mature Fuyu can produce 500 or more fruit! Jiro is the form of Fuyu most common in California; Imoto is the form most common in Japan.

## Hachiya Persimmon

Very large oblong red-orange fruit (has a short point) with very rich flavor. The best for cooking. Astringent until fully ripe; must be squishy soft before you can eat it. December.

## Autumn Rosa Plum

Large fruit with purple-red skin, amber flesh streaked red. Firm fruit, excellent flavor. Self-fruitful. Very late: early to late September. Holds well on tree and ripens over a long period.

## Burgundy Plum

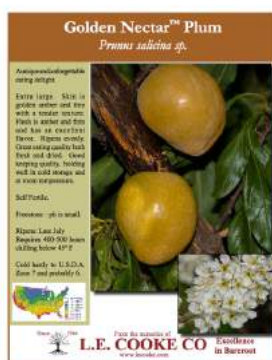

Red skin with red flesh all the way to the pit. Mellow, sweet, great for fresh eating. Self-fruitful. Pollenizer for plummy. Holds on tree well: early July to early September!

## Casselman Plum

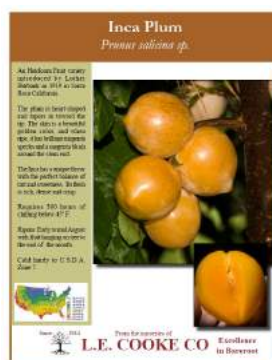

Red skin with yellow-to-red flesh. Natural variation of Santa Rosa. Sweet flesh with tart skin. Self-fruitful. Early August.

## Golden Nectar Plum

Extra large fruit has thin, golden amber skin and amber, firm flesh. Small freestone pit. Sweet with rich flavor. Dries well. Late July.

## Inca Plum

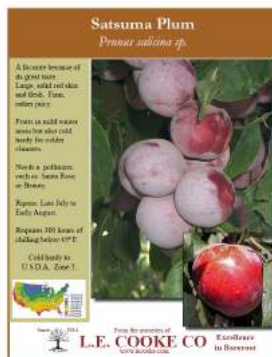

Beautiful golden fruit with red specks. Rich, dense, crisp fruit with a balance of sweet and tart. Luther Burbank introduced this in 1919. Early to mid-August.

## Santa Rosa Plum

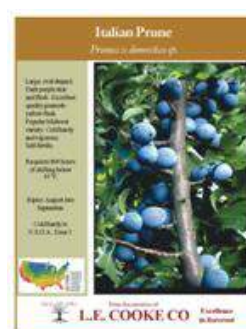

Purplish tart skin, yellow-to-red sweet flesh. Very popular and productive, heavy producing all-purpose plum. Self-fruitful and good pollinizer for other plums and pluots. Mid-June.

## Satsuma Plum

Red plum, firm dark red juicy flesh, amazing rich flavor. Excellent! A true gourmet fruit. Needs pollinizer. August.

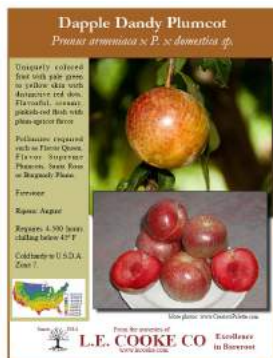

## Italian Plum (Prune)

Large fruit with dark purple skin, yellow flesh. A commercial prune variety with excellent super-sweet flavor. Self-fruitful. August - mid-September.

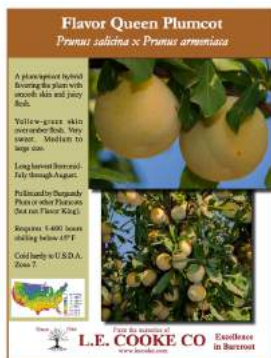

## Dapple Dandy Pluot

Taste test winner! Mottled red and yellowish fruit with tangy sweet plum-apricot flavor. Outstanding! Pollinize with Flavor Supreme, Flavor Queen, or Santa Rosa plum. August.

## Flavor Queen Pluot

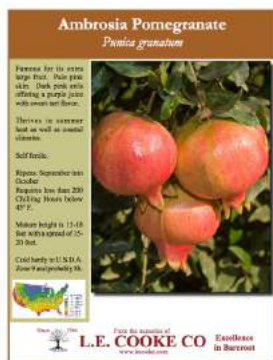

Light green fruit ripens to bright yellow; golden flesh. One of the sweetest, firm, juicy, not tart. Pollinize with Dapple Dandy or Flavor Supreme or Santa Rosa plum. Long harvest mid-July through August.

## Flavor Supreme Pluot

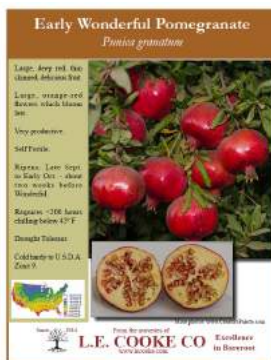

Taste test winner; one of the best summer fruits. Greenish mottled fruit with red flesh. Sweet, rich, tangy, early. Outstanding! Pollinize with Santa Rosa plum or any other pluot. June. [photo Dave Wilson]

## Ambrosia Pomegranate

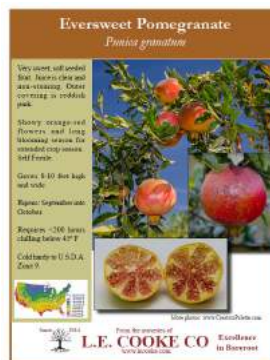

Very large fruit is pale pink, with very dark arils and juice. Sweet-tart, very rich flavor. Sept - Oct

## Early Wonderful

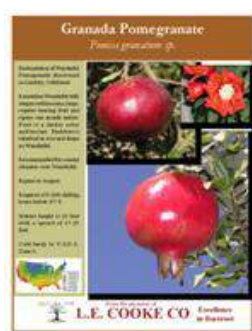

Earlier-ripening variant of the standard large red-fruited variety. Showy orange-red flowers in May - June, high-quality fruit ripens in October.

## Eversweet Pomegranate

Very sweet fruit with soft seeds. Juice is clear and non-staining. Long bloom season. October - November.

## Granada Pomegranate

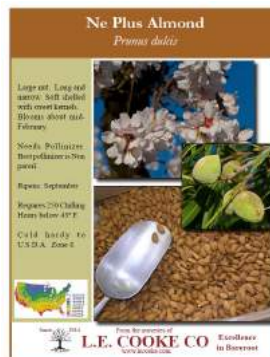

Natural variation of Wonderful. Deeper red blossoms, ripens a month earlier, a bit less tart. October.

## Wonderful Pomegranate

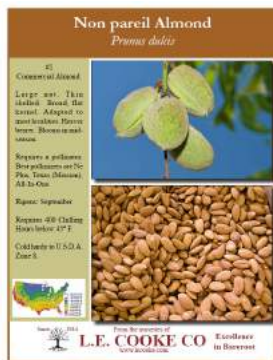

The standard large red-fruited variety. Showy orange-red flowers in May - June, high-quality fruit ripens in October - November.

## Ne Plus Almond

Important local commercial variety. Very early bloom--late Feb. - early March. Requires pollinizer such as Nonpareil.

## Nonpareil Almond

The #1 commercial almond. Very early bloom--late Feb. - early March. Requires pollinizer such as Ne Plus.

## Chandler Walnut

This hybrid between English walnut and a Chinese species produces high-quality red kernels! Flavor like Chandler.

## Crystal White Lilac

Pure white blooms practically glow. Fragrant, long-lasting blooms  
Leaves are bright green.

**Katherine Havemeyer Lilac Krasavitsa Moskvyy Lilac**

Large lavender-purple buds open to soft lilac-pink. French hybrid.

Light pink buds open to creamy white, double flowers. French hybrid.

## Lavender Lady Lilac

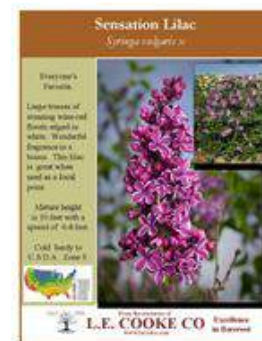

True lilac colored flowers in huge clusters. Descanso hybrid, but very fragrant. One of the best.

## Ludwig Spaeth Lilac

Wine purplish-red flowers in huge clusters. Fragrant. French hybrid.

## Sensation Lilac

Wine-red flowers are edged with white. Very striking, really stands out. Super fragrant. French hybrid.

## Akebono flowering cherry

Beautiful flowering cherry with a spreading and slightly weeping habit. Billows of soft pink, double flowers. Give it room to spread--about 15' across. Paint the trunk with interior white latex paint when young to prevent sunburn. Needs excellent drainage.

---

## Taiwan flowering cherry

Stunning magenta-red bell-shaped flowers are very early in late winter. Bronze fall color. Tiny fruit attract birds, not messy. Tree gets about 20' wide and tall, can be trained lower.. Paint the trunk with interior white latex paint when young to prevent sunburn. Needs excellent drainage.

---

## Bubba Desert willow

New! Larger flowers and leaves than the species. Bicolor blossoms are lavender and dark purple. Blooms all summer.

---

## Burgundy Desert willow

Darker flowers than the species. Blooms all summer.

---

## Autumn Fantasy hybrid

Fast-growing tree (3 - 5'/year) to 50' with 40' spread. Leaves in fall are bright red, with pink undersides--very strong, reliable fall color.

---

## October Glory Red Maple

Excellent variety of red maple with a round shape. Fast growing (3 - 4'/year) to 40' tall and broad. Dark red fall color. One of the best shade trees.

---

## Columbia hybrid Sycamore

Very fast growing shade tree. Resistant (not immune!) to anthracnose blight *and* mildew. Nice dappled shade, usually deep rooted. One of the few very fast trees without significant drawbacks.

---

## Roberts California

Very fast growing shade tree. Resistant (not immune!) to anthracnose blight. Leaves are big and bold. California native. Limited availability.

---

## Purple Pony Flowering plum

Naturally dwarf red-leaf plum to 10 - 12'; easily kept lower. White flowers make a strong contrast against dark red new growth. Very little or no fruit. Excellent small tree for garden or patio.

---

## Don Egolf hybrid Chinese

New hybrid from US National Arboretum. Vivid rosy mauve flowers, no seed pods. Slow growing, compact habit. Large shrub or small tree. Good disease resistance.

## Merlot Oklahoma Redbud

Merlot variety of Oklahoma redbud has vivid burgundy foliage in spring that stays purple in summer. One of the best redbuds for garden or landscape. Shiny leaves, upright habit. Excellent large shrub or small tree.

## Oklahoma Redbud

Hybrid 'Oklahoma' is more tolerant of garden watering than *C. occidentalis*, more heat-tolerant than *C. canadensis*. One of the best redbuds for garden or landscape. Shiny leaves, upright habit. Excellent large shrub or small tree.

## Western Redbud

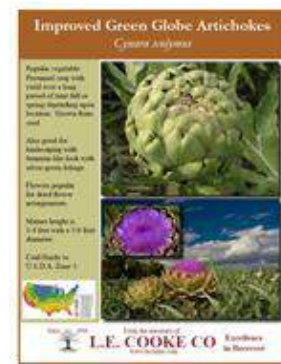

Beautiful magenta flowers in March. Grey-green foliage. Grow as large shrub or small multi-trunked tree. Nice plantings in the UC Davis Arboretum. Very drought-tolerant. Prone to rot if over-watered in summer. Supply limited.

## Village Green Zelkova

Fast grower with smooth trunk, arching habit, nice fall color (rusty red).

## Artichoke, Improved

F-1 hybrid with reduced spines, large round heads, consistent quality and high production.

## Asparagus, U.C. 157

F-1 hybrid from UC Riverside introduced in 1978. Selected for disease resistance, tighter head (holds the head during higher temps), all-green color, low female percentage, and high production.

## Cooke's Purple Wisteria

aka Cooke's Special. Very fast-growing, large vine with fragrant purple flowers which open all at once in early spring. This variety often has a few blooms in summer as well. Blooms best when irrigated infrequently. Prune hard just after bloom. Will bloom in part shade.

## White Silky Wisteria

Very fast-growing vines with extra fragrant, pure white flowers. Blooms best when irrigated infrequently.
