

## Braeburn Apple

Late season, crisp and tangy, similar to Granny Smith but richer flavor. Excellent keeper. Green with dark red blush. October-November harvest. Self-fruitful.

## Fuji Apple

Sweet, crisp and flavorful, excellent keeper. Late September. Excellent pollener for other apple varieties. Self-fruitful.

## Blenheim (Royal) Apricot

The standard, with delicious juicy fruit. Very early in this area-- late May - June.

## Boysenberry, thornless

Very large fruit, very productive. Reddish-black fruit. Sweet and tart all-purpose berries. The berry of Knott's Berry Farm! June.

## Emerald blueberry

Southern Highbush. Large berries, very productive, great flavor. Ripens over a long period.

## Jewel blueberry

Southern Highbush. 5 to 6 feet tall with 4 to 5 foot spread. Vigorous plant, very productive, large high-quality fruit. Early to mid season.

## O'Neal blueberry

Southern Highbush. Four-foot-tall bush. Attractive flowers, nice fall color. Fruit ripens very early and over a long period. "Considered by some to have the best flavor of any of the Southern Highbush types..." [MBN]

## Doyle's Dutchman's Pipe

Exclusive! Very large, curved fruit is very sweet.

## Santa Cruz Dark

Origin unknown. Seedless fruit has brown skin, amber interior. Banana flavor

## Violette de Bordeaux Fig

Natural dwarf tree, easily kept under 10'. Bears very heavily. Fruit is small, black, with red flesh. Very sweet.

## Black Emerald Seedless

Jet black when ripe. Firm flesh, early fruiting, very sweet. 1994 USDA introduction. July - August.

## Blueberry Seedless Grape

Heirloom variety from Chico, this is apparently a Concord grape hybrid. Seedless fruit is small, intensely flavored: very sweet and tangy, with a hint of blueberry flavor. Great for drying. Fruit holds well, hangs on vine into fall and gets sweeter. Vine is very productive and has nice fall color. August - September.

## Eastern Concord seedless

Variety of the American Concord grape that is nearly seedless. Classic grape juice flavor. Ripens late August into September.

## Flame Seedless Grape

Very vigorous, productive red seedless grape with good flavor and texture. Ripens August - September

## Midgely's Purple Seedless

Firm, crisp fruit, great for fresh eating and raisins. Very productive, very large bunches of fruit. Ripens September.

## Ruby Seedless Grape

Dark red, sweet, crisp fruit. Ripens in August.

## Chico Jujube (Chinese

"Round, flat-bottomed fruit of medium size. Known for its rich, sweet and tangy flavor." -- DWN

## Black Beauty Mulberry

Fruit like juicy blackberries. Harvest in early summer for over a month. Birds love them. Naturally dwarf, slow-growing. Seeds are sterile.

## Double Delight Nectarine

Beautiful flowers, excellent fruit on this attractive landscape tree. Mid-July.

## Fantasia Nectarine

Bright red skin, firm fleshed fruit. One of the best. Mid - late July.

## Flavortop Nectarine

Excellent fruit, firm texture; showy flowers. Early to Mid-July.

## Heavenly White Nectarine

Outstanding flavor and texture; one of the best summer fruits of all. July.

## Necta Zee Nectarine

Miniature tree. "Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less." -- Dave Wilson Nursery

## Arctic Supreme Peach

Astounding white peach. Rich flavor, firm texture (unlike most white peaches).  
Cling ("nearly freestone when fully ripe").

## Gold Dust Peach

Excellent early peach with very good flavor and firm flesh. Excellent to plant with later varieties. Mid-June.

## Honey Babe Miniature

Very high quality fruit on a miniature tree. Easy way to grow peaches in very limited space; nice accent in herb or vegetable garden. Mid-July.

## Loring Peach

One of the best. Showy flowers, large fruit, very productive, great texture, top-rated flavor! Highly recommended! Mid-July.

## O'Henry Peach

Large showy flowers. Very productive, firm texture, very good quality fruit with rich flavor. Excellent all-purpose late peach. August.

## Red Baron Peach

Stunning double red blooms--the showiest of all. Wonderful landscape tree. Very rich, sweet, juicy fruit over a long period. Softens quickly, eat right away. Mid-July to early August. Low chilling hours.

## Rio Oso Gem Peach

Very large fruit with firm texture and excellent flavor, on a naturally small tree. An outstanding very late variety. One of the best. Mid-August.

## Saturn

Spectacular flowers. Large fruit is juicy, sweet, low-acid. Low chilling hours.

## 20th Century Pear (Asian) Shinko Pear (Asian)

(aka Nijisseiki, "Apple Pear") Earliest variety. Juicy fruit with pleasant flavor. Very susceptible to fireblight, but vigorous so it can outgrow it seasonally. Self-fruitful. Late July - mid-August.

Medium - large brownish fruit. Very rich, sweet with good texture. Stores well for several weeks. One of the best. Very good fireblight resistance. August - mid-September.

## Shinseiki Pear (Asian)

Medium size yellow, juicy fruit with mild flavor. Self-fruitful. Late July - mid-August.

## Warren Pear (European)

Very productive, even when young. Juicy fruit is soft textured when ripe. No grit cells. Very resistant to fireblight. Reliably self-fruitful.

## Fuyu Persimmon

Beautiful tree worth considering as a focal point in the landscape. New growth, winter fruit, fall color all are showy. Fruit litter should be considered in placement. Medium size flattened red-orange fruit can be eaten while still firm. Non-astringent. November.

## Hachiya Persimmon

Very large oblong red-orange fruit (has a short point) with very rich flavor. The best for cooking. Astringent until fully ripe; must be squishy soft before you can eat it. December.

## Burgundy Plum

Red skin with red flesh all the way to the pit. Mellow, sweet, great for fresh eating. Self-fruitful. Pollenizer for pluery. Holds on tree well: early July to early September!

## Emerald Beaut Plum

Taste test winner! Greenish-yellow skin and flesh. Firm flesh gets sweeter but stays crisp as fruit ripens. Long harvest--late August through September. Pollenize with Burgundy, Nubiana or Late Santa Rosa plums, or Flavor King Pluot.

## Nubiana Plum

Large dark purple plum with sweet, firm amber flesh. Holds well on tree for 2 - 3 weeks. Self-fruitful. Mid - late July.

## Santa Rosa Plum

Purplish tart skin, yellow-to-red sweet flesh. Very popular and productive, heavy producing all-purpose plum. Self-fruitful and good pollenizer for other plums and pluots. Mid-June, into July.

## Satsuma Plum

Red plum, firm dark red juicy flesh, amazing rich flavor. Excellent! A true gourmet fruit. Needs pollenizer. August.

## Weeping Santa Rosa

Weeping variant of the Santa Rosa that makes a lovely garden accent. Very productive, self-fruitful. Ripens early to mid July

## Dapple Dandy Pluot

Taste test winner! Mottled red and yellowish fruit with tangy sweet plum-apricot flavor. One of the best! Pollenize with Flavor Supreme, Flavor Queen, or Santa Rosa plum. August.

## Flavor Supreme Pluot

Taste test winner; one of the best summer fruits. Greenish mottled fruit with red flesh. Sweet, rich, tangy, early. Outstanding! Pollenize with Santa Rosa plum or any other pluot. The earliest pluot. June.

## Parfianka Pomegranate

Does very well here. Highly rated for flavor. Great for juice or fresh eating. UC Davis introduction.

---

## Wonderful Pomegranate

The standard large red-fruited variety. Showy orange-red flowers in May - June, high-quality fruit ripens in October - November.

---
