

Apples

Braeburn Apple

Late season, crisp and tangy, similar to Granny Smith but richer flavor. Excellent keeper. Green with dark red blush. October-November harvest. Self-fruitful.

Fuji Apple

Sweet, crisp and flavorful, excellent keeper. Late September. Excellent pollenizer for other apple varieties. Self-fruitful.

Apricots

Blenheim (Royal) Apricot

The standard, with delicious juicy fruit. Very early in this area--late May - June.

Berries--Blackberry

Boysenberry, thornless

Very large fruit, very productive. Reddish-black fruit. Sweet and tart all-purpose berries. The berry of Knott's Berry Farm! June.

Blueberries

Emerald blueberry

Southern Highbush. Large berries, very productive, great flavor. Ripens over a long period.

Jewel blueberry

Southern Highbush. 5 to 6 feet tall with 4 to 5 foot spread. Vigorous plant, very productive, large high-quality fruit. Early to mid season.

O'Neal blueberry

Southern Highbush. Four-foot-tall bush. Attractive flowers, nice fall color. Fruit ripens very early and over a long period. "Considered by some to have the best flavor of any of the Southern Highbush types..." [MBN]

Figs

Black Mission Fig

Purplish-black skin, pink flesh, rich flavor. Heavy bearing large tree. Fresh or dry. One of the classic California figs.

Violette de Bordeaux Fig

Natural dwarf tree, easily kept under 10'. Bears very heavily. Fruit is small, black, with red flesh. Very sweet.

Grapes, table

Black Monukka Seedless Grape

Seedless black table grape, very sweet with crisp texture. August - September.

Blueberry Seedless Grape

Seedless fruit is small, very sweet, with a hint of blueberry flavor. Great for drying. Vine is very productive and has nice fall color. August - September.

Flame Seedless Grape

Very vigorous, productive red seedless grape with good flavor and texture.

Ripens August - September

Ruby Seedless Grape

Dark red, sweet, crisp fruit. Ripens in August.

Jujube

Chico Jujube (Chinese date)

“Round, flat-bottomed fruit of medium size. Known for its rich, sweet and tangy flavor.” -- DWN

Mulberries

Persian Mulberry

Fruit like juicy blackberries.
Harvest in early summer for
over a month. Birds love them.

Teas Weeping Mulberry

Sweet, juicy fruit in early
summer. Birds love them. Tree
makes a striking accent, or
playhouse for young kids.

Nectarines

Double Delight Nectarine

Beautiful flowers, excellent fruit
on this attractive landscape tree.
Mid-July.

Fantasia Nectarine

Bright red skin, firm fleshed
fruit. One of the best. Mid - late
July.

Flavortop Nectarine

Excellent fruit, firm texture;
showy flowers. Early to Mid-
July.

Heavenly White Nectarine

Outstanding flavor and texture;
one of the best summer fruits of
all. July.

Necta Zee Nectarine

Miniature tree. "Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less." -- Dave Wilson Nursery

Peaches

Arctic Supreme Peach

**Astounding white peach. Rich flavor, firm texture (unlike most white peaches).
Cling ("nearly freestone when fully ripe").**

Gold Dust Peach

**Excellent early peach with very good flavor and firm flesh.
Excellent to plant with later varieties. Mid-June.**

Honey Babe Miniature Peach

Very high quality fruit on a miniature tree. Easy way to grow peaches in very limited space; nice accent in herb or vegetable garden. Mid-July.

Loring Peach

One of the best. Showy flowers, large fruit, very productive, great texture, top-rated flavor! Highly recommended! Mid-July.

O'Henry Peach

Large showy flowers. Very productive, firm texture, very good quality fruit with rich flavor. Excellent all-purpose late peach. August.

Red Baron Peach

Stunning double red blooms-- the showiest of all. Wonderful landscape tree. Very rich, sweet, juicy fruit over a long period. Softens quickly, eat right away. Mid-July to early August. Low chilling hours.

Rio Oso Gem Peach

Very large fruit with firm texture and excellent flavor, on a naturally small tree. An outstanding very late variety. One of the best. Mid-August.

Saturn

Spectacular flowers. Large fruit is juicy, sweet, low-acid. Low chilling hours.

Pears, Asian

20th Century Pear (Asian)

(aka Nijisseiki, "Apple Pear")
Earliest variety. Juicy fruit with pleasant flavor. Very susceptible to fireblight, but vigorous so it can outgrow it seasonally. Self-fruitful. Late July - mid-August.

Shinko Pear (Asian)

Medium - large brownish fruit. Very rich, sweet with good texture. Stores well for several weeks. One of the best. Very good fireblight resistance. August - mid-September.

Shinseiki Pear (Asian)

Medium size yellow, juicy fruit with mild flavor. Self-fruitful. Late July - mid-August.

Pears, European

Warren Pear (European)

Very productive, even when young. Juicy fruit is soft textured when ripe. No grit cells. Very resistant to fireblight. Reliably self-fruitful.

Persimmons

Fuyu Persimmon

Medium size flattened red-orange fruit can be eaten while still firm. Non-astringent. November. A mature Fuyu can produce 500 or more fruit! Jiro is the form of Fuyu most common in California; Imoto is the form most common in Japan.

Hachiya Persimmon

Very large oblong red-orange fruit (has a short point) with very rich flavor. The best for cooking. Astringent until fully ripe; must be squishy soft before you can eat it. December.

Plums

Burgundy Plum

Red skin with red flesh all the way to the pit. Mellow, sweet, great for fresh eating. Self-fruitful. Pollenizer for pluerry. Holds on tree well: early July to early September!

Emerald Beaut Plum

Taste test winner! Greenish-yellow skin and flesh. Firm flesh gets sweeter but stays crisp as fruit ripens. Long harvest--late August through September. Pollenize with Burgundy, Nubiana or Late Santa Rosa plums, or Flavor King Pluot.

Nubiana Plum

Large dark purple plum with sweet, firm amber flesh. Holds well on tree for 2 - 3 weeks. Self-fruitful. Mid - late July.

Santa Rosa Plum

Purplish tart skin, yellow-to-red sweet flesh. Very popular and productive, heavy producing all-purpose plum. Self-fruitful and good pollenizer for other plums and pluots. Mid-June, into July.

Satsuma Plum

Red plum, firm dark red juicy flesh, amazing rich flavor. Excellent! A true gourmet fruit. Needs pollenizer. August.

Weeping Santa Rosa

Weeping variant of the Santa Rosa that makes a lovely garden accent. Very productive, self-fruitful. Ripens early to mid July

Pluots

Dapple Dandy Pluot

Taste test winner! Mottled red and yellowish fruit with tangy sweet plum-apricot flavor. One of the best! Pollenize with Flavor Supreme, Flavor Queen, or Santa Rosa plum. August.

Flavor Supreme Pluot

Taste test winner; one of the best summer fruits. Greenish mottled fruit with red flesh. Sweet, rich, tangy, early. Outstanding! Pollenize with Santa Rosa plum or any other pluot. The earliest pluot. June.

Pomegranates

Parfianka Pomegranate

Does very well here. Highly rated for flavor. Great for juice or fresh eating. UC Davis introduction.

Walnuts

Franquette Walnut

Med-large, elongated nuts with thin shell. Exceptional flavor. Large, beautiful tree. Last to bloom and leaf out. Late October.

Lilac

Katherine Havemeyer Lilac

Large lavender-purple buds open to soft lilac-pink. French hybrid.

Sensation Lilac

Wine-red flowers are edged with white. Very striking, really stands out. Super fragrant. French hybrid.

Redbud, Western

Western Redbud

Grows to 8 - 10'+, as large shrub or small multi-trunked tree. Beautiful magenta flowers in March, and distinctive grey-green foliage. Nice plantings in the UC Davis Arboretum. Very drought-tolerant and requires that summer irrigation be infrequent. Susceptible to verticillium wilt.

Walnuts

Northern California black walnut

The Northern California native species of black walnut. Beautiful bark, fast-growing, very tough tree, but hard to recommend for home gardens. Huge, hard to garden under. Very high quality nuts, collected along roadsides for specialty candy and ice cream markets. Wood is highly prized. Roots and leaves put a toxin into the soil below which prevents growth of some plants.
